# Razumovskyi Anatolyi

Senior PHP-Developer / System architect / Team Lead

Basically, I specialize in the development of WEB-projects, mainly using PHP technology. I have rudimentary skills to create and manage a full cycle of WEB-project development.

## Professional skills

---

### Frontend

HTML CSS SCSS LESS Gulp JavaScript jQuery  
Bootstrap Page making Vue.js Nuxt.js

### PHP

CodeIgniter Laravel Lumen Laminas Yii  
Mezzio Doctrine2 CLI PHPUnit PSR

### Storage

MySQL PostgreSQL Memcached Redis

### Other

OOP DDD Nginx GraphQL Rest API GIT  
Linux Docker

## Education

---

### Marketing

**University "Ukraine"**

09.2008 - 09.2012

Received a bachelor's degree in Marketing.

### Computer science

**Odessa National Polytechnic University**

09.2018 - 12.2020

Received a bachelor's degree in Computer Science.

**Odessa National Polytechnic University**

09.2020 - 12.2022

Received a master's degree in IT project management.

# Work experience

---

## Team Lead and System Architect at TRAVELLIZY

02.2017 - 05.2022

I take part in the development of a large-scale project in the field of travel. The peculiarity of the project is a wide coverage of travel topics and an extensive stack of development technologies.

*Used:* JavaScript (jQuery, Gulp) PHP (Laravel, Lumen, Zend Expressive, cli, Doctrine2, twig, PSR, PHPUnit) DDD PostgreSQL Nginx GraphQL RabbitMQ Docker SCRUM

## Full Stack WEB-Developer at Re-bit Digital

02.2016 - 12.2016

I performed tasks related to the development, adjustment and optimization of various WEB-resources. I was developing in a team of several people.

*Used:* HTML CSS (SCSS) Js (jQuery, Gulp) PHP (Yii1, Zend1, Yii2, Laravel5, cli, cron) MySQL Nginx Payment System API

## Full Stack WEB-Developer and co-founder at personal startup

09.2015 - 01.2016

Together with my colleagues, I founded a startup related to investments and network marketing. I was mainly engaged in WEB development, technical support and led a team of several people.

*Used:* HTML CSS (LESS) JavaScript (jQuery, Grunt) PHP (Yii2, cli, cron, nested set, PHPUnit) MySQL Memcached Redis Nginx REST API Node.js Payment System API

## Full Stack WEB-Developer - Freelance

11.2013 - 09.2015

I took part in the development of the project (bulletin board for short and long-term rental apartments) with a large code base. I led a team of three people.

*Used:* HTML CSS (LESS) JavaScript (jQuery, Grunt) PHP (Yii2, cli, cron, twig) MySQL Memcached Nginx Node.js Payment System API

## Full Stack WEB-Developer at “Инкриз Украина”

08.2012 - 09.2013

In a team of two people, I developed and supported a project for the provision of services in the field of network marketing.

*Used:* HTML CSS JavaScript (jQuery) PHP (Yii1, cli, cron, nested set) MySQL Nginx Payment System API

## Computer course teacher at OKKK

09.2011 - 05.2012

I prepared the curriculum for the course and conducted training with groups of different ages.

*Used:* HTML CSS JavaScript PHP

## WEB-Developer - Freelance

09.2009 - 05.2012

I developed small presentation sites for sales representatives in the field of network marketing and advertising.

*Used:* HTML CSS JavaScript (jQuery) PHP (CodeIgniter) MySQL Apache2

## Site Administrator - Freelance

09.2007 - 04.2009

I configured and maintained several WEB-resources (using CMS) for earning on contextual advertising.

*Used:* HTML CSS cms-DLE

## Becoming history

---

I first became interested in web development at school, back in 2006. When the first Internet was connected, I immediately became interested in how web-sites are created and work. Since then, my path as a WEB-Developer has begun.

As a student, I continued to independently study web technologies that were interesting to me, developed the first startup, spoke at several conferences, received my first commercial experience and managed to work as a teacher of computer courses. During this time I have developed such qualities as: perseverance, improvisation, initiative and responsibility.

Further, I continued to develop and mainly worked with freelance offers on project development from scratch. Most of the time, I worked alone, but sometimes I collaborated with colleagues in a team of several people. After some time, I managed to accumulate some experience and emphasize a few more qualities: perfectionism, the desire to improve my own skills and leadership qualities.

Over time, I participated in the development of many projects in different directions. I have always tried to develop, learn new tools and approaches in web development. And more recently, I have delved deeper into architectural design and especially in DDD.

After that, I took the position of Team Lead and System Architect in a small startup Travellizy, which is rapidly developing and evolving into a major international travel project. I manage to observe and take part in building the business processes of a large company. At the moment, I continue to participate in the development of this project.

## Communication

---

I wrote several articles on <https://habr.com> (<https://habr.com/ru/users/nepster-web>)

Sometimes I take part in various conferences as a speaker.

Slides from public presentations at conferences can be found at the link on <https://slides.nepster.pro>.

## My interests

---

My most important hobby is my occupation and development. I try to constantly develop, learn new approaches and tools, and sometimes speak at small conferences as a speaker. My role in the company and relationships in the team are very important for me.

Based on the specifics of mental activity, I try to devote time to sports and outdoor activities. I really like active collective events with a bit of excitement.

In general, the range of my interests is quite wide, however, I will highlight some of the most significant and interesting hobbies for me:
